

Glenorchy

LOCAL GOVERNMENT AREA

Health is closely tied to our daily environment. This Community Health Check presents information about the environmental, social and economic state of the Glenorchy local government area.

Community Health
Check 2026

About us

	Glenorchy LGA	Tasmania
Our population	50,411	557,571
Aboriginal population	 5.4%	 5.4%
Population by age		
Population by gender	49% Male 51% Female	49% Male 51% Female
Median age in years	37	42
Born outside Australia	 27%	 21%

Sources: Our population, Aboriginal population, Population by age, Population by gender, Born outside Australia, and Median age in years: Australian Bureau of Statistics, 2021 Census All persons QuickStats, Local Government Areas, Glenorchy

Social and economic conditions

Education

The proportion of people in the Glenorchy LGA who have completed Year 12 and above is higher than for Tasmania overall.

PER CENT OF ELIGIBLE POPULATION WHO HAVE COMPLETED YEAR 12 AND ABOVE

Higher education levels are associated with better health outcomes.

Unemployment rates

The rate of people in the Glenorchy LGA who are unemployed is higher than in Tasmania overall.

Median weekly income

Weekly income per household is less in the Glenorchy LGA than in the rest of Tasmania.

Motor vehicles

Eighty-nine per cent (89%) of households in the Glenorchy LGA have one or more motor vehicles.

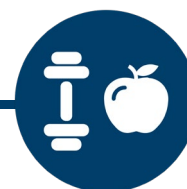

Home ownership

Fewer people in the Glenorchy LGA own their homes outright compared to the rest of Tasmania.

	Glenorchy	Tasmania
Owned outright	29%	37%
Owned with mortgage	32%	33%
Rented	36%	26%

Healthy living

Self-reported health

In 2022, thirty-five per cent (35%) of Glenorchy residents rated their health as “excellent” or “very good”. This is lower than the rate for Tasmania.

ADULTS REPORTING THEIR OWN HEALTH AS ‘EXCELLENT’ OR ‘VERY GOOD’

How people feel about their own health, their state of mind and their life in general is a common measure of health. (Australia's Health 2018. AIHW)

Risk factors

Risk factors are conditions or behaviours that make it more likely people will get a chronic condition or health problem.

	Glenorchy	Tasmania
Overweight/obese body mass index (BMI)	58%	62%
Current smoker	17%	15%
Daily/occasional vaping	4%	3%
Single occasion risky drinking (>4 alcoholic standard drinks)*	28%	37%
Insufficient moderate/vigorous activity[†]	25%	24%
Did not meet recommended daily vegetable intake[‡]	93%	91%
Did not meet recommended daily fruit intake[‡]	62%	61%

In the Glenorchy LGA, around 17% of people aged 18 years and over, are daily and current smokers.

Healthy living

Psychological distress

More adults in the Glenorchy LGA are likely to experience high or very high levels of psychological distress compared with Tasmania overall.

PEOPLE WITH HIGH OR VERY HIGH LEVELS OF PSYCHOLOGICAL DISTRESS

Psychological distress is a term used to describe unpleasant feelings or emotions that can influence how we function in daily life.

Health care

Immunisations

Ninety-six per cent (96%) of children in the Glenorchy LGA are fully immunised by the age of five, which is higher than the rate for Tasmania.

GP and emergency department encounters

In 2022, 80% of people from the Glenorchy LGA saw a general practitioner for their own health in the previous twelve months*.

On average each year during 2022-2024, 7,334 individuals from the Glenorchy LGA visited an emergency department (144 people per 1,000 population[^]), with an average of 15,788 ED presentations per year (311 ED presentations per 1,000 population[^]).

[^]Estimated population for June 2023=50,808

Sources: Psychological distress and GP encounters: Tasmanian Population Health Survey LGA Supplementary Data Tables 2022

Immunisations: Primary Health Information Development Unit, Social Health Atlas of Australia: Local Government Areas; Compiled based on data provided by Australian Childhood Immunisation Register, Medicare Australia, 2021

Emergency department encounters: Department of Health and Human Services, Health Central Data Warehouse, Tasmania. Analysed by Primary Health Tasmania; accessed January 2026.

*Individual totals may be higher due to patients potentially visiting more than one practice outside an LGA area or possible de-identification linkage errors from patient administration extraction software

Health outcomes

Public hospital admissions

During the five years from 2020-21 to 2024-25 there were 81,023 admissions to Tasmanian public hospitals from the Glenorchy LGA, with 3, overnight stays.

NUMBER OF PUBLIC HOSPITAL ADMISSIONS BY AGE GROUP AND GENDER 2020-21 TO 2024-25

TOP 10 PRIMARY HOSPITAL DIAGNOSIS ^{*A}	TOP 10 CHARLSON COMORBIDITIES ^{**}	TOP 10 POTENTIALLY PREVENTABLE HOSPITALISATIONS
Care involving dialysis	Renal disease	Diabetes complications
Other cataract Pain in throat and chest	Any malignancy, including lymphoma and leukaemia, except malignant neoplasm of skin	Chronic obstructive pulmonary disease
Liveborn infants according to place of birth	Chronic pulmonary disease	Cellulitis
Other cataract	Cerebrovascular disease	Type 2 diabetes
Myelodysplastic syndromes	Congestive heart failure	Congestive heart failure
Abdominal and pelvic pain	Diabetes without chronic complication	Urinary tract infections
Problems related to medical facilities and other health care	Myocardial infarction	Convulsions epilepsy
Single delivery by caesarean section	Diabetes without chronic complication	Iron deficiency anaemia
Chrohn's disease (regional enteritis)	Dementia	Ear, nose and throat infections
Other chronic obstructive pulmonary disease	Metastatic tumour	Asthma

*Excludes diagnoses coded as "persons encountering health services in other circumstances" and "other medical care" which cover a wide range of diverse categories and are as such less useful in understanding reasons for hospitalisations.

Health outcomes

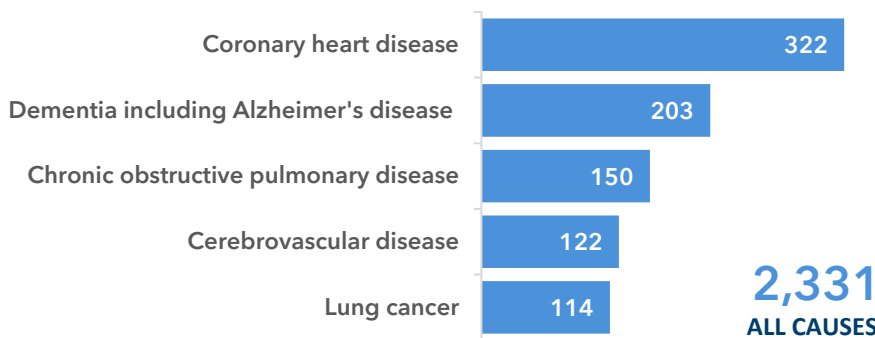

^The *primary hospital diagnosis* is the diagnosis established after study (for example, at the completion of the episode of care) to be chiefly responsible for causing the episode of admitted patient care. It is essentially the main reason someone needed to be admitted to hospital.

^^Patients admitted to hospital often have other comorbid conditions, which may or may not be related to their diagnosis. *The Charlson Comorbidities Index* classifies 17 comorbid conditions which may influence mortality risk.

Causes of death

During 2019-2023 coronary heart disease (13.8%), dementia including Alzheimer disease (8.7%), chronic obstructive pulmonary disease (6.4%), cerebrovascular disease (5.2%), and lung cancer (4.9%) were the leading causes of the 2,331 deaths in the Glenorchy LGA. The age standardised death rate in 2019-2023 was 659 per 100,000 compared with the overall age standardised rate of 567 for Tasmania.
